

# How to Make a Light and Sound Rain Stick

1. Fold a sheet of foil in half. Then fold it in half again a few more times to make a narrow rectangle.

2. Use your hands to scrunch or squeeze the foil rectangle.

3. Wrap the foil around a pencil.

4. Slide the foil off the pencil. Then pull on both ends of the foil to stretch it and make it longer.

5. Take a second sheet of foil and repeat steps 1 and 2, above.

6. This time, wrap the foil around a marker.

7. Slide the second piece of foil off the marker. The coil should be a bit bigger than the first one. Pull on both ends to stretch it longer.

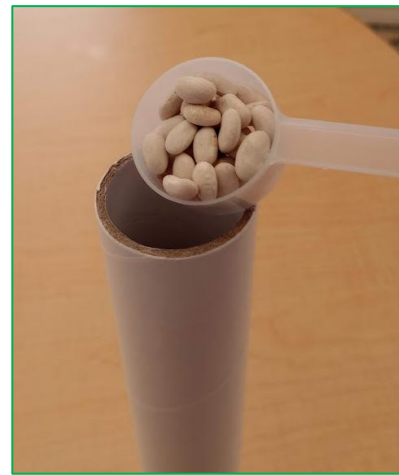

8. Put the smaller coil inside the bigger one.

9. Then put both pieces of foil into the tube you are using to make your rain stick.

10. Use the funnel to put two scoops of uncooked rice into the tube.

11. Use the scoop to put one scoop of dried beans into the tube.

12. Put the lid on the end of the tube.

13. Decorate your rain stick with markers and washi tape, and by coloring and gluing on images of the Sounds of the God Worlds, from the handout.
